## Second Dimension

👁 28 ✓ 2 ★ 3

### Chapter 1 by Maarten van Elzelingen

What if you were able to enter another dimension, but in real life you would also move if you move in that other dimension. Would that be cool to you?

Well... this story is about a boy that has the power to do that, but he is not too happy with it.

### Chapter 2 by Ruvimbo Dube

When he moves in one dimension it has to be movement of intention, not physically but emotionally or from reasoning. Your intention in one dimension would leak into another, did you want for someone you didn't particularly like to have a spontaneous seizure? That same intent would mirror itself into the next world as well... but there are rules to this, unspoken of course.

The most important one, the boy (lets call him Paul), dubbed it as The Phenomenon of Proportions. In one world the effect from the others is small and docile, in one world you feel intense anger and in the other a prickling annoyance. The opposite applies, if in the second world you have an inkling of happiness in the first you might feel a great Euphoria. Note this however you will still maintain independent emotion influences from other worlds only mix with your current ones. It makes for an intresting cocktail really and usually not that pleasent but

those are the most fun to make aren't they?
